

SHAHZAIB FURQAN

MERN STACK DEVELOPER

[Portfolio](#) | [GitHub](#) | Lahore, Pakistan

PROFESSIONAL SUMMARY

MERN Stack Developer with 1.5+ years of hands-on learning and project practice, focused on building responsive React interfaces, REST APIs, CRUD applications and database-driven systems using Node.js, Express.js and MongoDB. Current IT/Data Analyst experience adds practical exposure to business data, reporting and operational workflows.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, React.js, React Router

Backend: Node.js, Express.js, REST APIs, MVC, Service Architecture

Database: MongoDB, Mongoose, CRUD, Data Modeling, Populate

Tools: Git, GitHub, VS Code, Vite, Postman, Render

PROFESSIONAL EXPERIENCE

IT / Data Analyst — KPO / Distribution Environment | Current

- Collect and digitize operational sales and distribution data.
- Prepare structured reports and information for management.
- Work with real business workflows, sales records and reporting requirements.
- Use business-domain knowledge to build practical software solutions.

PROJECTS

Sales Distribution Management System (MERN) — React, Node.js, Express.js, MongoDB, Mongoose

- Business-focused system for product distribution, product management, daily sales, stock workflows and reporting.
- Built REST API structure with controllers, services, models and MongoDB relationships.

Expense Tracker — React, JavaScript, CSS

- Application for recording expenses, organizing data and presenting useful summaries.

E-Commerce Web Application — React.js | Node.js | Express.js | MongoDB

- Developed a full-stack e-commerce web application with product listing, product details, shopping cart, and user-friendly navigation.

ADDITIONAL STRENGTHS

- Practical understanding of business data, sales distribution and reporting workflows.
- Strong focus on clean project structure, reusable components and real-world problem solving.
- Open to Junior MERN Stack Developer and Junior Backend Developer roles.
