SHAHZAIB FURQAN

MERN Stack Developer | Backend Developer

Lahore, Pakistan | +92 324 9430801 | sjobs5245@gmail.com

Portfolio | github.com/furqan20479 | LinkedIn

PROFESSIONAL SUMMARY

MERN Stack Developer with hands-on experience building full-stack web applications using MongoDB, Express.js, React.js, and Node.js. Proficient in designing RESTful APIs, implementing MVC architecture, service-layer backend design, JWT authentication, and role-based access control. Experienced in building reusable React components, custom hooks, and clean frontend-backend integration. Additional entry-level backend exposure with Python, Django, and Django REST Framework. Deployed projects on Vercel and Netlify. Seeking a Junior MERN Stack or Backend Developer role to contribute hands-on project experience to real-world software development.

TECHNICAL SKILLS

Backend: Node.js, Express.js, REST APIs, MVC Architecture, Service Layer, OOP, Modular Backend Design, CRUD Operations

Frontend: React.js, JavaScript (ES6+), React Router, React Hooks, Custom Hooks, Component Architecture, HTML5, CSS3, Vite

Database: MongoDB, Mongoose, Data Modeling, References, Populate, MongoDB Atlas

Authentication: JWT Authentication, Role-Based Access Control (RBAC), bcrypt Password Hashing, Authorization Middleware

Tools & Deployment: Git, GitHub, Postman, VS Code, Vercel, Netlify, npm, Fetch API, Environment Variables

Python (Entry Level): Python, Django, Flask, Django REST Framework, Basic CRUD APIs, JWT, Template Inheritance

MERN STACK DEVELOPMENT EXPERIENCE

MERN Stack Developer – Personal Projects & Practice *2025 – Present*

Independent / Personal Development, Lahore, Pakistan

- Built multiple full-stack MERN applications covering end-to-end development from database design to React frontend integration.
- Designed and developed RESTful APIs with Express.js, practicing CRUD operations extensively across multiple projects and use cases.
- Structured Express.js backends using MVC architecture with clear separation between routes, controllers, services, and models.
- Created a reusable `BaseService` class implementing common database operations, reducing code duplication across projects.
- Integrated React frontends with Express backends using Fetch API, reusable custom hooks, and service-layer abstraction.
- Built reusable React components with isolated state management, custom hooks, and separation of concerns.
- Implemented JWT authentication, bcrypt password hashing, role-based access control, and protected API routes.
- Deployed frontend projects on Vercel and Netlify with environment variable configuration.
- Maintained projects on GitHub following consistent folder structure and modular code organization.

PROJECTS

Sales Distribution Management System (SDMS) *MERN Stack | GitHub*

- Designed a business-focused full-stack system to digitize product management, daily sales, shop billing, and reporting workflows.
- Built RESTful CRUD APIs for product master management and structured daily-sale and billing workflows using MongoDB and Mongoose.
- Implemented Mongoose references and populate for relational data modeling between products, sales, and shop records.
- Structured modular backend with separate routes, controllers, and service layers alongside reusable React frontend components.

MERN Boilerplate – Reusable Full-Stack Starter *MERN Stack | GitHub*

- Built a production-ready MERN boilerplate with React frontend and Express.js backend for rapid project initialization.

- Configured MongoDB/Mongoose, environment variables, JWT authentication setup, and authentication-ready middleware.
- Implemented a reusable `BaseService` pattern handling create, read, update, and delete operations across any model.

Notes and Academic Productivity Platform *MERN Stack | Netlify*

- Developed RESTful APIs for managing subject notes with subject categorization, title, description, and document support.
- Built modules for assignment tracking, timetable management, and GPA calculation as part of a student productivity dashboard.
- Applied service-based Express architecture and MongoDB data modeling to cleanly separate business logic from routes and controllers.
- Deployed frontend on Netlify with API integration to Express backend.

ADDITIONAL EXPERIENCE

Python / Django – Entry Level *2022 – 2023*

- Built small web applications using Python, Django, and Flask including basic CRUD APIs and Django REST Framework endpoints.
- Worked with Django views, URL routing, template inheritance, and JWT-based authentication at an entry level.

IT / Technical Operations *2020 – Present*

- Manage operational business data, reporting workflows, and distribution system records in a professional KPO environment.

EDUCATION

Bachelor of Arts (B.A.) *2026 – Present*

Allama Iqbal Open University (AIOU), Lahore, Pakistan

TRAINING & CERTIFICATIONS

- **MERN Stack Development Training** – Hands-on training covering MongoDB, Express.js, React.js, Node.js, REST APIs, JWT authentication, and full-stack application development.
- **HTML, CSS, JavaScript, PHP & MySQL** – Brains College | Result: 88%
